EDUCATION

Otto-von-Guericke University , <i>Master of Science - Data and Knowledge Engineering</i>	04.2025 – Present Magdeburg, Germany
Kalinga Institute of Industrial Technology , <i>Bachelor of Technology - Computer Science and Engineering</i> 9.09 CGPA	06.2018 – 05.2022 Bhubaneswar, India

WORK EXPERIENCE

Product Executive , <i>TV9</i> - Led comprehensive website transformation, boosting organic traffic by 150%, retention by 44%, and engagement time by 156%. - Created over 20 detailed PRDs and prioritized the backlog using the RICE framework, achieving 90% feature alignment with user impact and delivery feasibility. - Operated within an Agile/Scrum framework, actively contributing to sprint planning and managing the software development lifecycle (SDLC) for feature releases. Redesigned site architecture to cut LCP and TBT by 40%, reaching Core Web Vitals compliance on 85% of high-traffic pages. - Guided UX discovery through user interviews, A/B testing, and iterative prototyping in Figma.	01.2023 – 12.2023 India
Associate Software Engineer , <i>Highradius Corporation</i> - Engineered and deployed robust and scalable backend services using Java 8/11, Spring Boot, and Hibernate, adhering to SOLID principles to power core B2B SaaS functionalities. - Drove engineering productivity by developing reusable Java utilities (e.g., a regex-free data scraper), which automated complex data extraction and reduced development time. - Architected and built highly scalable infrastructure by creating REST APIs that processed over 100k+ events daily into a MySQL database. - Ensured over 90% test coverage by utilizing JUnit and Mockito, promoting robust CI/CD pipelines. - Collaborated with QA and product teams in agile sprints, resolved over 30 bugs per sprint, and achieved a 95% on-time delivery rate over four sequential releases.	06.2021 – 12.2022 India

SKILLS

Product Management: Product Roadmapping, PRD & BRD Documentation, User Journey Mapping, Feature Prioritization, Stakeholder Communication, Go-to-Market Planning, UX Research, KPI Tracking & Product Analytics

Backend Development: Java, Python, Spring Boot, Microservices Architecture, RESTful API Design, Node.js, Object-Oriented & Functional Programming, Concurrency, Hibernate/JPA

Frontend Development: TypeScript, React.js, JavaScript (ES6+), Next.js, Redux, HTML5, CSS3, Tailwind CSS

Databases: SQL, NoSQL, Message Brokers, Event-Driven Architecture

DevOps & Testing: CI/CD (Jenkins), Docker, Git, Unit & Integration Testing (JUnit, Mockito), TDD Concepts, Agile/Scrum, Jira

PROJECTS

Advanced Robotic Process Automation

Owned the implementation and enhancement of **Java agents** for a large-scale RPA framework that automated data collection from client web portals. Utilized **Core Java** and **Selenium** to process large volumes of data, improving agent productivity and boosting the effectiveness of the entire product.

APAAS

Contributed to a cutting-edge Application Platform as a Service (APAAS) by building backend agents with **Spring Boot**. Championed code quality by initiating a **Test-Driven Development (TDD)** approach and writing comprehensive **JUnit/Mockito** tests, directly aligning with the value of creating clean, testable, and maintainable code.

Robust Data Scraper Utility

Engineered an innovative **Java utility** that automated complex data extraction from HTML, completely eliminating the need for manual regex creation. This tool was integrated as a core, time-saving component of the broader RPA framework.

CERTIFICATES

Product-Led Certification 

Mastering Data Structures & Algorithms 

Capstone: Retrieving, Processing, and Visualizing Data with Python
