EDUCATION

Otto-von-Guericke University , <i>Master of Science - Data and Knowledge Engineering</i>	04.2025 – Present Magdeburg, Germany
Kalinga Institute of Industrial Technology , <i>Bachelor of Technology - Computer Science and Engineering</i> 9.09 CGPA	06.2018 – 05.2022 Bhubaneswar, India

WORK EXPERIENCE

Product Manager , <i>Family-Owned Manufacturing Business</i> - Collaborated on building internal solutions for procurement, inventory, and vendor data tracking, streamlining cross-departmental reporting and cutting manual work by ~30%. - Mapped and restructured 5+ core workflows based on feedback from 20+ field operators, laying the groundwork for future digitization. - Conducted end-to-end supply chain audits, identifying 15+ recurring bottlenecks that informed a proposed roadmap to reduce delivery delays by ~20%. - Outlined and wireframed dashboard concepts to improve real-time KPI tracking, enhancing visibility and shift-level awareness across two key operational units. - Defined process checkpoints and metrics across 5+ manufacturing workflows, enabling more structured tracking and laying the foundation for eventual automation.	01.2024 – 02.2025 India
Product Executive , <i>Associated Broadcasting Co. Pvt Ltd (TV9)</i> - Delivered end-to-end website transformation, improving organic traffic by 150%, retention by 44%, and engagement time by 156%. - Authored 20+ detailed PRDs and prioritized backlog via RICE framework, ensuring 90% feature alignment with user impact and delivery feasibility. - Orchestrated feature releases across five cross-functional teams using Agile/Scrum, driving a 20% reduction in cycle time and improving team velocity by 12 story points per sprint. - Re-architected site architecture to reduce LCP and TBT by 40%, achieving Core Web Vitals compliance on 85% of high-traffic pages. - Facilitated UX discovery through user interviews, A/B testing, and iterative prototyping in Figma.	01.2023 – 12.2023 India
Associate Software Engineer , <i>Highradius Corporation</i> - Engineered backend services using Spring Boot and Java, powering APAAS and Advanced RPA tools used across B2B clients. Automated CRUD generation through custom Java agents using Spring MVC, decreasing engineering overhead by 30%. - Constructed REST APIs and log processors linked to MySQL handling 100K+ daily events, supporting scalable event-based analytics. - Maintained >90% test coverage using JUnit and Mockito, enabling high-confidence CI/CD pipelines. - Liaised with QA and product teams, contributed to agile sprints to resolve 30+ bugs per sprint, maintaining 95% on-time delivery rate across 4 consecutive releases.	06.2021 – 12.2022 India

SKILLS

Product Management: Product Roadmapping / Agile, Scrum & Sprint Planning / PRD & BRD Documentation / User Journey Mapping / Feature Prioritization / Stakeholder Communication / Cross-functional Collaboration / Go-to-Market Planning / A/B Testing & UX Research / KPI Tracking & Product Analytics

Software Development: Object-Oriented Programming / RESTful API Design / MVC Architecture / CI/CD & Version Control / Modular Codebase Planning / Backend Systems Integration

Programming Languages: Java / Python / SQL / JavaScript / Bash

Databases & Storage: MySQL / PostgreSQL / MongoDB / DBMS

Frameworks & Libraries: Spring Boot / Hibernate ORM / React.js / Pandas / NumPy / Scikit-learn

Analytics & Data Tools: Advanced Excel / Looker / Google Analytics / Tableau

DevOps & Tools: Git / Docker / Jenkins / Jira / Notion

IDE: Eclipse / VS Code / Jupyter Notebook / Postman

Testing & QA: JUnit / Mockito / Selenium / Test Case Documentation

CERTIFICATES

Product-Led Certification 

Mastering Data Structures & Algorithms 

Capstone: Retrieving, Processing, and Visualizing Data with Python
